What is your experience or background with art, such as painting, illustration and drawing?

What is your background with plants and gardens? (No plant science or horticulture experience is necessary. I'm looking at the range of experiences associated with plants, gardens, and horticulture. For example, have you ever had a garden? Spent time in a public garden?)

In general, what are your expectations for this course? What do you hope to gain from it?

What else would you like me to know about you?

Thank you!
