

Sefra and I are not following a particular recipe!

is is a piece of my bed sheets!!

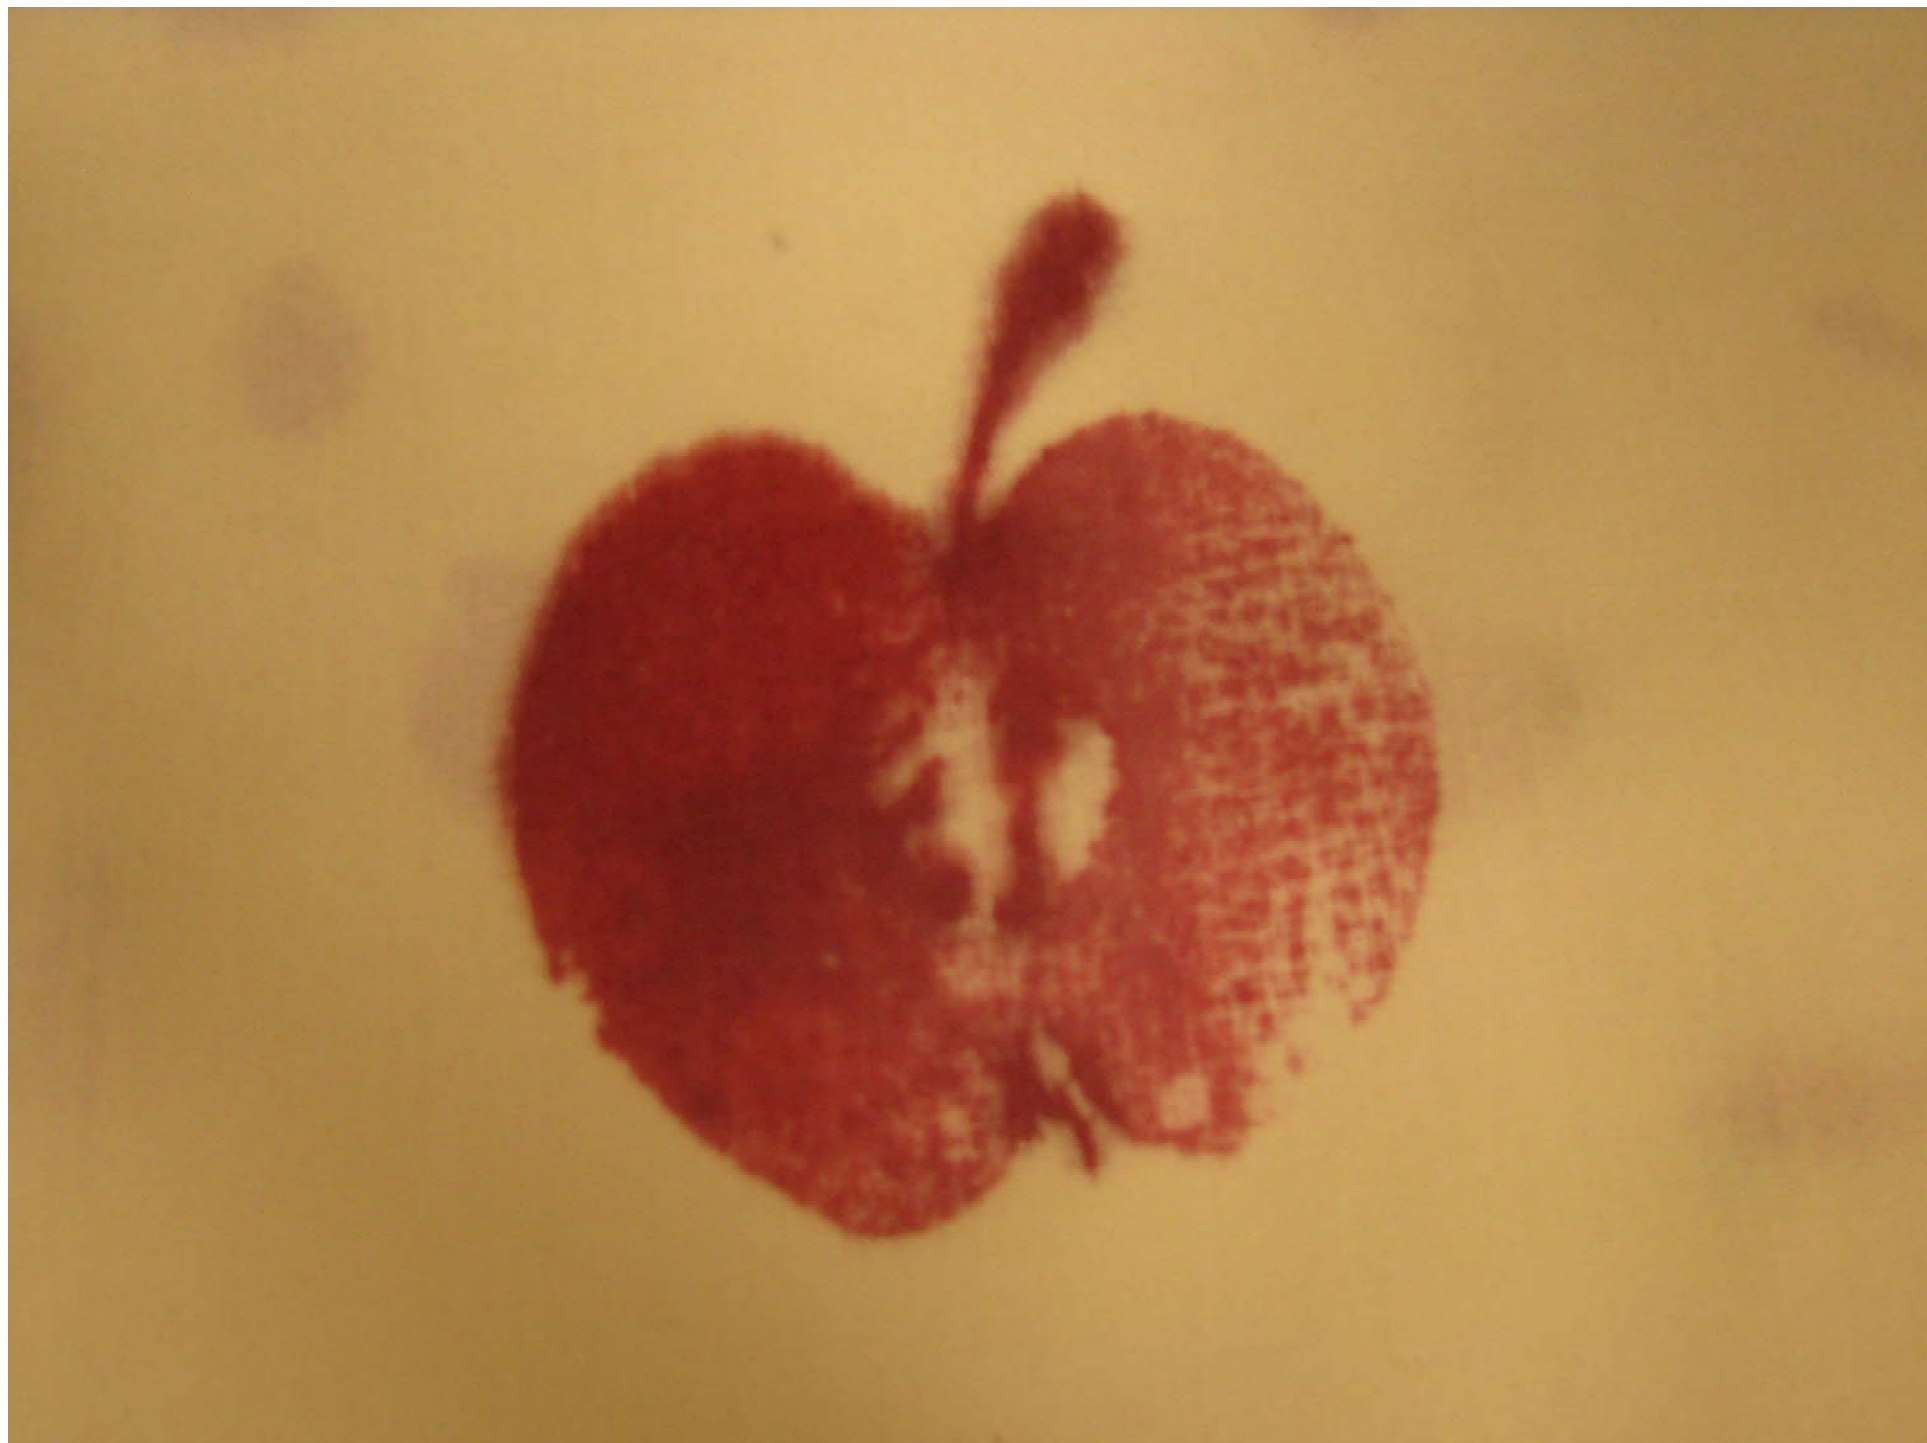

The dye is running because the fabric is too loosely sewn

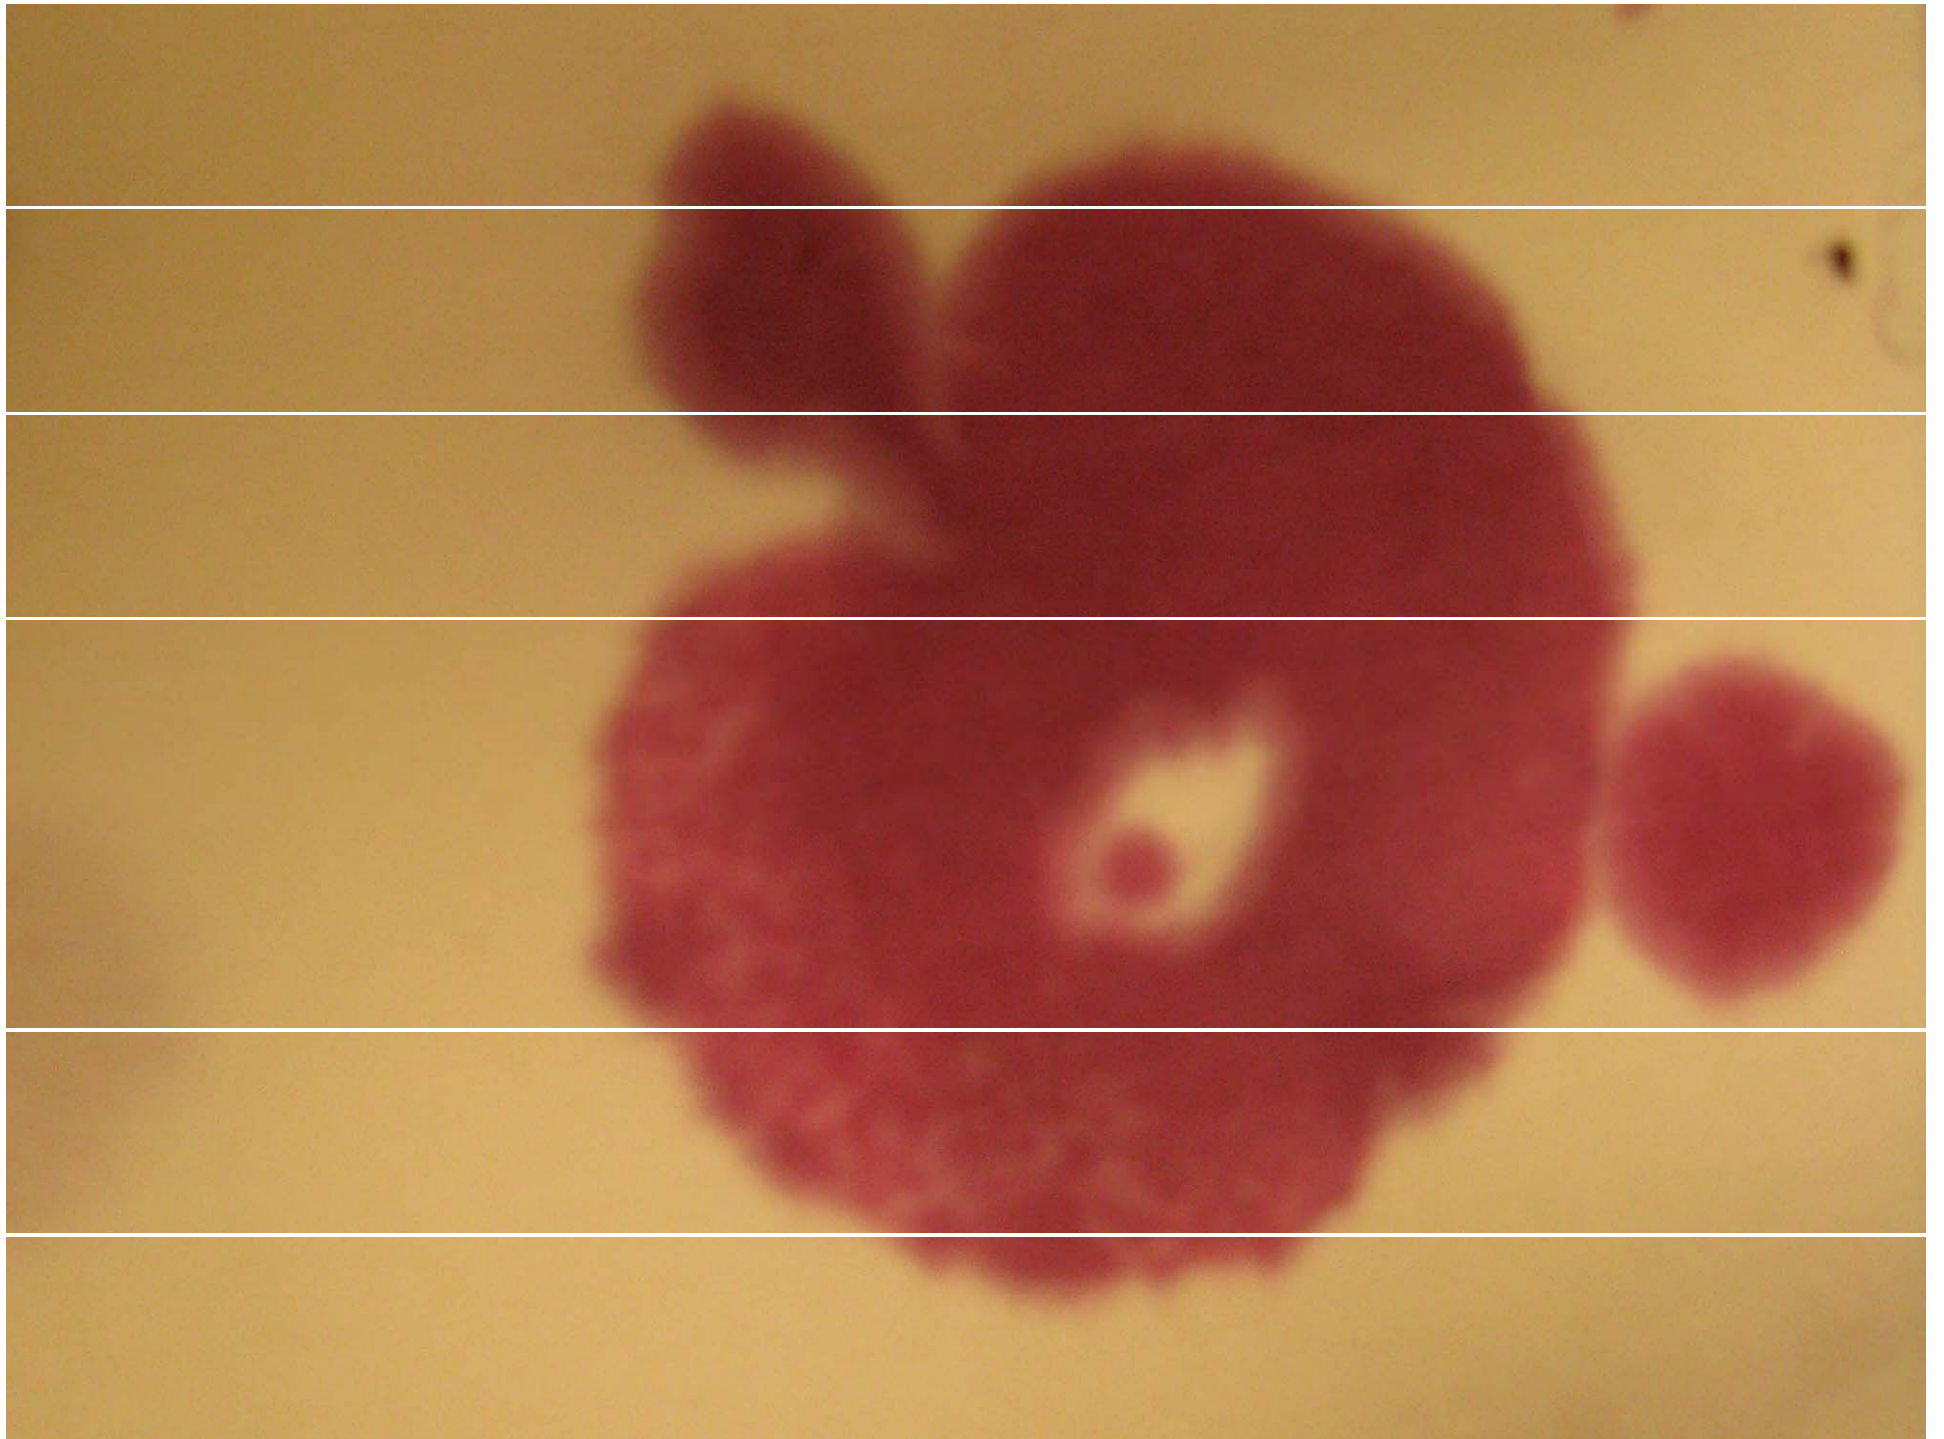

Horticulture is the object of my art too

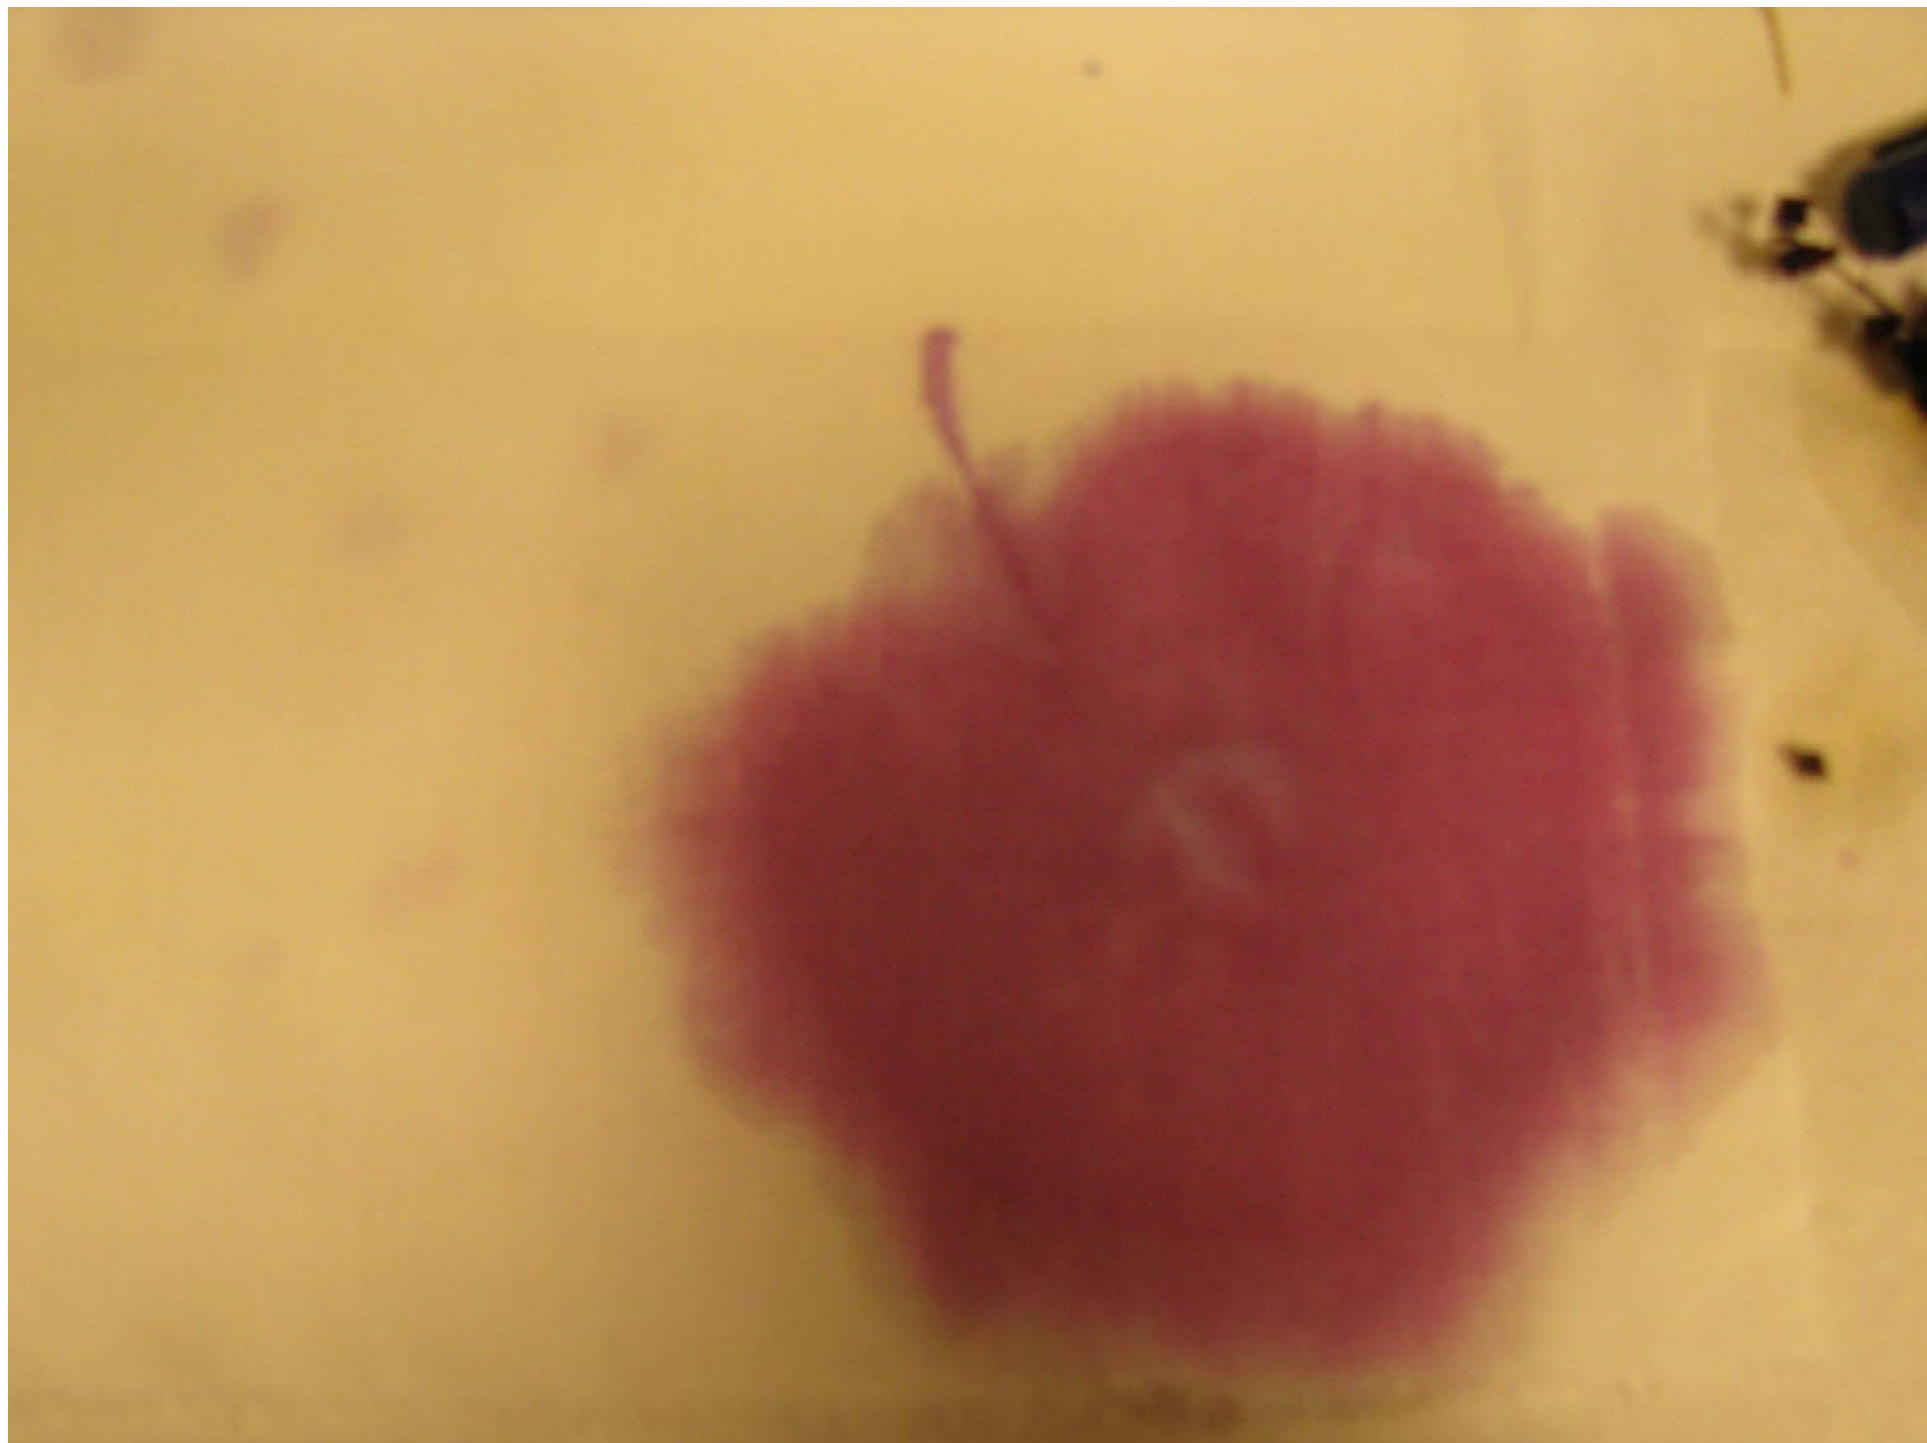

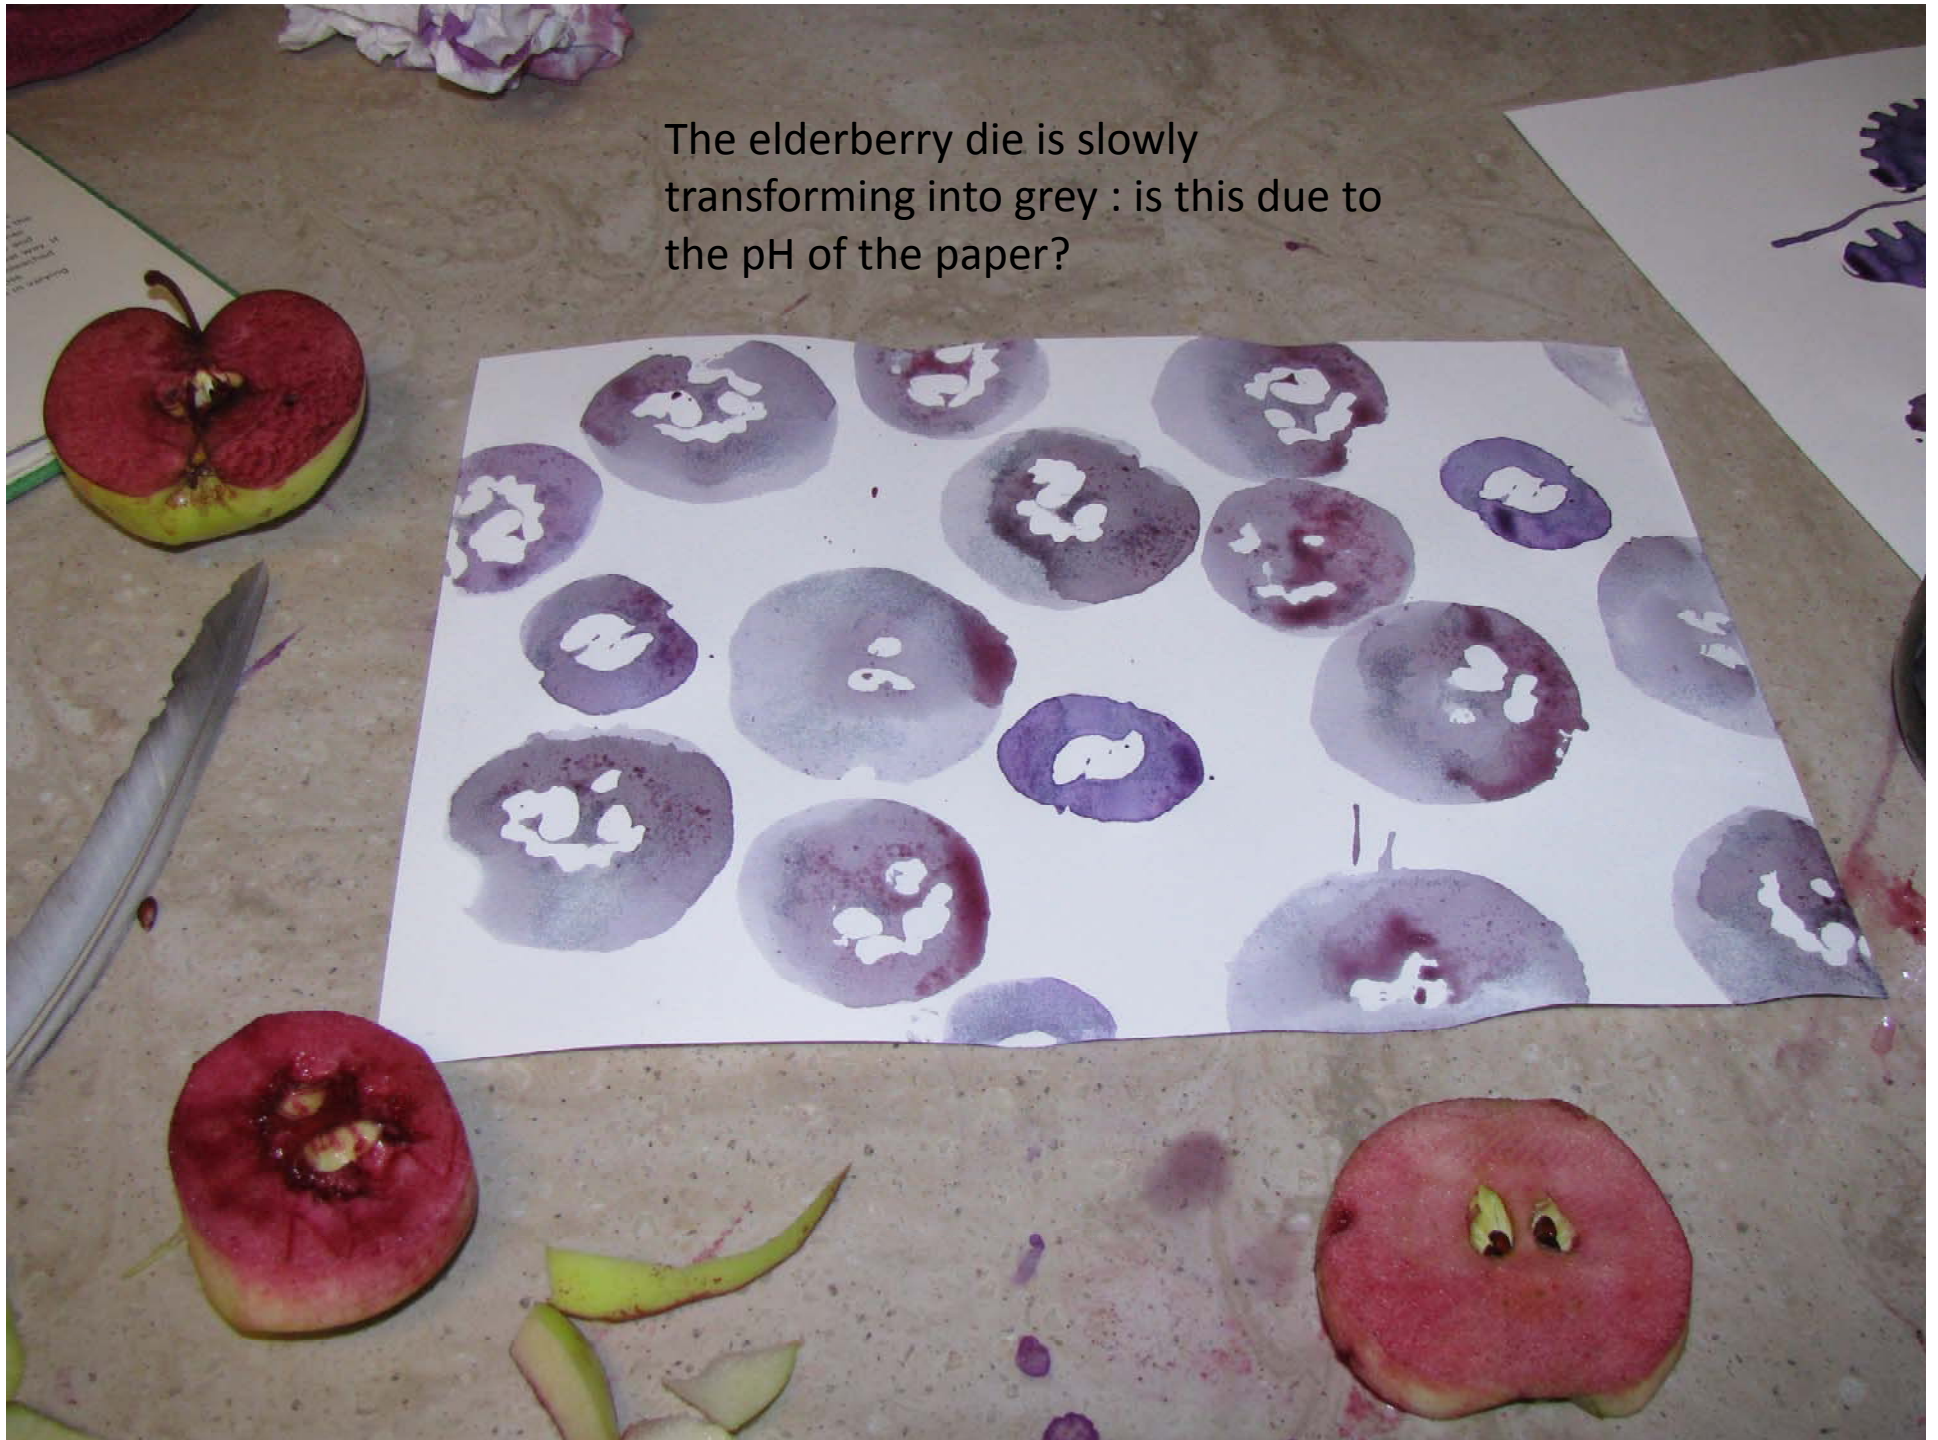

This is better quality fabric

The elderberry die is slowly transforming into grey : is this due to the pH of the paper?

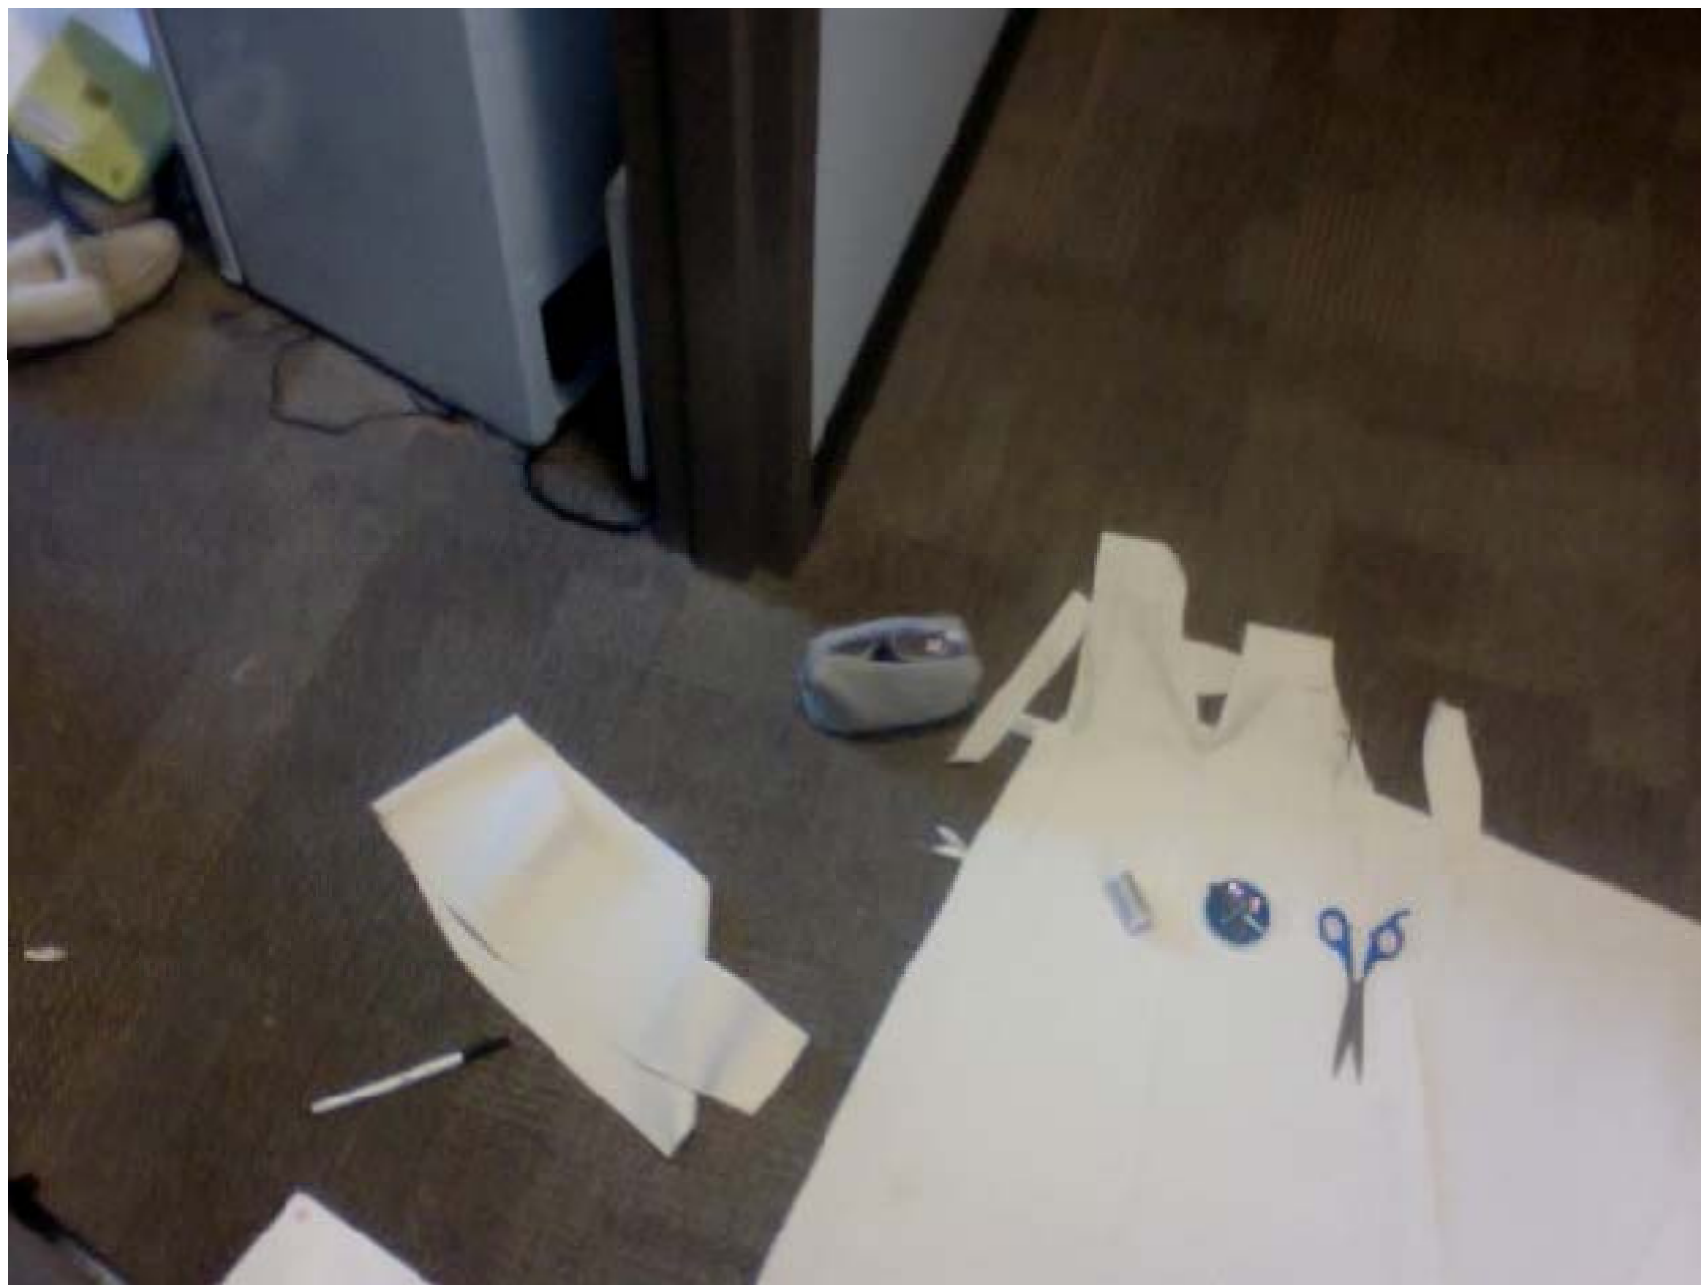

Drawings by eye didn't work out too well...

I decided to leave the dried beetroot pieces on the fabric here

A very small pan for such a large piece!

The stiff dress!
