

The background features a central horizontal band of bright orange with a fine, woven texture. Above and below this band are dark green areas containing overlapping, semi-transparent geometric shapes, primarily triangles and trapezoids, creating a layered, mountain-like effect.

Four Seasons Window with Multimedia Bouquet

Amanda Armstrong

I started with the idea of a 2D and 3D
combined bouquet

Plastic Flowers (made from
moldable plastic pellets)

Colored Pencil Flowers
(Not included in final
project because they just
didn't look right in the
bouquet)

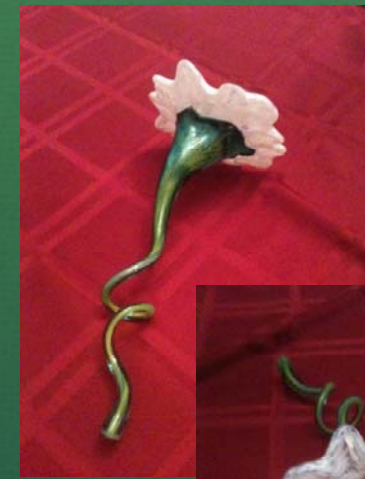

I made a basket for a vase, but I ended up with too many flowers, and had to switch to the current glass vase

The initial vase with the first set of flowers.

With the addition of more flowers, this vase became too small.

Glass Flower made at Corning Museum of Glass

The flower that I made for this project

The creation of a flower (these pictures are from making a different flower, on a different date

I made some maple leaf roses to add to
the bouquet

Then I made the four seasons window,
using photoshop

After creating the digital painting, I used a frame and some pieces of leftover wood to create the window frame and sill.
