

Table 1. Geneva apple rootstocks: disease and pest resistances , other characteristics and availability (G. Fazio, H.S. Aldwinckle and T.L. Robinson).

| Rootstock | Tree Size | Resistance to: | | | | Cold Hardiness | Other Characteristics | Availability |
|-----------|-----------|----------------|--------------|---------------------------|--------------------|----------------|--|--------------------|
| | | Fire Blight | Phytophthora | Replant Disease | Woolly Apple Aphid | | | |
| G.11 | M.9 | Resistant | Resistant | Susceptible | Susceptible | Good | | 2011: Limited |
| G.16 | M.9 | Very Resistant | Resistant | Sosceptible in some soils | Susceptible | Good | Sensitive to latent viruses; brittle union with some cvs | 2011: Limited |
| G.30 | M.7 | Very Resistant | Resistant | Tolerant | Susceptible | Good | | Available |
| G.41 | M.9 | Very Resistant | Resistant | Resistant | Resistant | High | Possible susceptibility to Tomato Ringspot Virus | 2011: Very Limited |
| G.202 | M.26 | Very Resistant | Resistant | Tolerant | Resistant | Untested | | 2011: Very Limited |
| G.935 | Large M.9 | Resistant | Resistant | Resistant | Susceptible | Good | | 2011: Limited |
