Presentation on H2A at Expo on January 24, 2012 at 3:30

We will have in attendance the new administrators of the NYDOL to explain the many changes to your local NYSDOL services as you have traditionally known them.

There has been great concern in the last couple of years as to the difficulty in applying for a H2A program. Efforts on both the State and Federal level are in place to make this application much more consistent and user friendly.

Vilda Mayuga Director, Division of Immigration Policies and affairs from NYSDOL will be in attendance to outline changes and reasons for such. This will be an excellent opportunity to find out exactly how your farm can perhaps make this H2A application a much smoother process. You are encouraged to come and ask your questions.

I will then host a Q and A on this and other topics of Farm labor for those in attendance. I have offered similar meetings at the close of the last few Becker Forums when the topic was Labor.
